

GEOGRAPHIC DISTRIBUTION

AMPHIBIAN AND REPTILE RECORDS AND RANGE EXTENSIONS FOR MEXICO. We report here new records of Mexican amphibians and reptiles presently in the collection of the senior author (EAL). Unless noted all specimens were collected by the authors.

AMPHIBIA

AMBYSTOMA TIGRINUM VELASCI. Nuevo Leon: EAL 4065 (5 ad.), EAL 4066 (28 larvae), 20.3 km W, 10.6 km N Dr. Arroyo at La Lajita on El Pequeno Road, 21 July 1975. Reported for Nuevo Leon but once before (Reese, 1971, J. Herp., 5 (1/2), and this is the second collection for this state. *CHIROPTEROTRITON PRISCA*. Coahuila: EAL 3577 (3 sp.), 17.9 km E San Antonio de las Alazanas, 22 July 1973; Ernest A. Liner and Richard M. Johnson; EAL 4011 (3 sp.), 14.5 km E San Antonio de las Alazanas, 16 July 1975. First salamanders reported for the state. *PSEUDOEURYCEA GALEANAE*. Nuevo Leon: EAL 3103 (14 sp.), Ojo de Agua at Pablillo, 17 July 1972; EAL 3105 (1 sp.), 13.7 km S Pablillo, 18 July 1972; EAL 3110 (2 sp.), 16.8 km S Pablillo, 18 July 1972; EAL 3789 (2 sp.), 3.4 km N El Orito, 17 July 1974; EAL 4031 (8 sp.), 13.9 km S Pablillo at Puerto de Cienguillas, 19 July 1975; EAL 4047 (2 sp.), 12.9 km N La Ascension, 19 July 1975. Known from three collections previous to this report (Taylor, 1941, Proc. Biol. Soc. Wash. 54:81-86; Walker, 1955, Occ. Papers Mus. Zool., Univ. Mich. 567; Reese, 1971, op. cit.). The localities listed here give further localities for Nuevo Leon. EAL 3789 constitutes the northernmost record to date. *BUFO COMPACTILIS*. Tlaxcala: EAL 868 (1 sp.), 3.4 km NW San Ildefonso Hueyotlipan, 8 July 1963; EAL 869 (8 sp.), 4.4 km SE Calpulalpan, 8 July 1963. Ernest A. Liner and Richard Whitten. First recorded for this state. *SCAPHIOPUS HAMMONDI MULTIPLICATUS*. Tlaxcala: EAL 866 (82 sp.), 3.9 km NW San Ildefonso Hueyotlipan, 8 July 1963; EAL 870 (1 sp.), 4.4 km SE Calpulalpan, 8 July 1963; Ernest A. Liner and Richard Whitten. First records for this state.

REPTILIA

KINOSTERNON FLAVESCENS FLAVESCENS. Nuevo Leon: EAL 4073 (1 sp.), 24.8 km S Dr. Arroyo, 21 July 1975. Most southern record of this turtle to be collected in the state. *EUMECES BREVIROSTRIS PINEUS*. Nuevo Leon: EAL 3388 (1 sp.), 12.9 km S Pablillo at Puerto de Cienguillas, 22 May 1973; Ernest A. Liner, Douglas A. Rossman and Robert L. Erwin; EAL 3583 (1 sp.), Arroyo Mesquital from Poterio Prieto to 7.7 km S, 24 July 1973; Ernest A. Liner and Richard M. Johnson; EAL 3795 (1 sp.), 7.9 km N San Juan de

Mimbres, 17 July 1974; EAL 4032 (7 sp.), 13.9 km S Pablillo at Puerto de Cienguillas, 19 July 1975. The above records are new localities in the state and supplement those of Dixon (1969, Cont. Sci. L.A. Co. Mus. 168). *SCELOPORUS JARROVI OBERON*. Nuevo Leon: EAL 3765 (2 sp.), Laguna de Sanchez to San Isidro, 4.2 km E Laguna de Sanchez, 15 July 1974; EAL 3770 & 3772 (2 sp.), San Isidro to San Juan Bautista in Cañon San Juan Bautista, 15 July 1974; EAL 4089 (2 sp.), 4.2 km E San Isidro, 23 July 1975. Extends range east from Saltillo, Coahuila area approximately 64.5 km. *SCELOPORUS SPINOSUS SPINOSUS*. Nuevo Leon: EAL 3106 (2 sp.), 7.9 km N La Ascension, 18 July 1972; EAL 3107 (1 sp.), 16.0 km N La Ascension, 18 July 1972; EAL 3801 (1 sp.), 32.1 km S Galeana, 18 July 1974; EAL 3813 & 3814 (2 sp.), 6.1 km N La Ascension, 18 July 1974; EAL 3816 (4 sp.), 1.1 km N General Ignacio Zaragoza, 19 July 1974; EAL 3818 (1 sp.), 5.0 km N General Ignacio Zaragoza, 18 July 1974; EAL 3820 (2 sp.), 7.7 km N General Ignacio Zaragoza, 18 July 1974; EAL 3822 (1 sp.), 8.9 km N General Ignacio Zaragoza, 19 July 1974; EAL 3830 (1 sp.), 0.8 km N Mier y Noreiga, 20 July 1974; EAL 3834 (1 sp.), 9.0 km N Mier y Noreiga, 20 July 1974; EAL 4051 (1 sp.), 4.9 km N, 3.9 km SE La Ascension on La Caballada road, 19 July 1975; EAL 4061 (1 sp.), 5.6 km W Aramberri, 20 July 1975. Recorded but once in Nuevo Leon by Martinez (1967, Thesis, Universidad de Nuevo Leon) from Zaragoza. The above are further records for the state. *SCELOPORUS TORQUATUS BINOCULARIS*. Nuevo Leon: EAL 3599 (1 sp.), 8.7 km E Laguna de Sanchez in Cañon San Juan Bautista, 26 July 1973; EAL 3600 (1 sp.), 11.2 km E Laguna de Sanchez in Cañon San Juan Bautista, 26 July 1973; Ernest A. Liner and Richard M. Johnson; EAL 3764 (2 sp.), Laguna de Sanchez to San Isidro, 4.2 km E Laguna de Sanchez, 15 July 1974; EAL 3769 (3 sp.), San Isidro to San Juan Bautista in Cañon San Juan Bautista, 15 July 1974; EAL 3773 (12 sp.), San Juan Bautista to La Cienega in Cañon San Juan Bautista, 15 July 1974; EAL 4084 (6 sp.), 2.1 km E and to San Isidro, 23 July 1975. Recorded from Mexico only from the vicinity of Galeana and Arroyo Mesquital. These records extend range in Nuevo Leon approximately 63.0 km NNW of Galeana. *CROTALUS SCUTULATUS SCUTULATUS*. Nuevo Leon: EAL 4057 (1 sp.), 5.6 km W Aramberri, 20 July 1975. Recorded but twice for Nuevo Leon (Liner, 1964, Southwest. Natur. 8(4); Reese, 1971, op. cit.). The above is a new locality and fifth specimen reported for the state. *LAMPROPELTIS MEXICANA ALTERNA*. Nuevo Leon: EAL 4022 (1 sp.), 2.9 km W, 5.3 km S San Antonio de las Alazanas, Coahuila, 17 July 1975. This specimen represents the sixth for Mexico and the second for Nuevo Leon (Gehlbach, 1967, Cat. Amer. Amphib. Rept., 55.1).

Submitted by ERNEST A. LINER, 310 Malibou Blvd., Houma, La. 70360, RICHARD M. JOHNSON, 4170 Lantern Lane, Mobile, Ala. 36609 and ALLAN H. CHANEY, 1208 W. Richard, Kingsville, Texas 78363.
